

## Physics of Fluids

At the Forefront of Fluid Dynamics Research for Nearly 50 Years

### LEGEND

- 1) Continuous or catastrophic solid-liquid transition in jammed systems  
P. Coussot, N. Roussel, S. Jarny, and H. Chanson
- 2) Images of the floating world: Drainage patterns in thinning soap films  
S. Berg, E. A. Adelizzi, and S. M. Troian
- 3) Stretching distributions in chaotic mixing of droplet dispersions with unequal viscosities  
C. A. Florek and C. L. Tucker III
- 4) Touchdown of a sphere  
T. Leweke, M. C. Thompson, and K. Hourigan
- 5) Beads-on-string phenomena in wormlike micellar fluids  
M. C. Sostarecz and A. Belmonte
- 6) Wake of a low aspect ratio pitching plate  
J. H. J. Buchholz and A. J. Smits
- 7) Numerical simulations of interfacial instabilities on a rotating miscible magnetic droplet with effects of Korteweg stresses  
C.-Y. Chen and H.-J. Wu
- 8) Running magnetic spouts and hedgehogs  
J. Bico, T. Blum, M. Jullian, M. Fermigier, and J. E. Wesfreid
- 9) Large-eddy simulation of Rayleigh-Taylor instability  
W. H. Cabot, A. W. Cook, P. L. Miller, D. E. Laney, M. C. Miller, and H. R. Childs
- 10) Energy dissipation in spiral vortex layers wrapped around a straight vortex tube  
G. Kawahara
- 11) Three-dimensional chaotic mixing  
P. E. Arratia, M. M. Alvarez, T. Shinbrot, and F. J. Muzzio
- 12) Vortex dynamics in starting square water jets  
J. J. Ai, S. C. M. Yu, A. Wing-Keung Law, and L. P. Chua
- 13) Lagrangian simulation of evaporation droplet sprays  
H. Salman and M. Soteriou
- 14) Leading-edge tubercles delay stall on humpback whale (*Megaptera novaeangliae*) flippers  
D. S. Miklosovic, M. M. Murray, L. E. Howle, and F. E. Fish
- 15) Visualization of a fish wake using tobacco mosaic virus  
D. L. Hu, L. Mendel, and B. Chan
